fakhirzeeshan02@gmail.com

1850 Westchester Ave, Bronx, NY 10472, USA

SUMMARY

Full Stack MERN Developer with a solid foundation in JavaScript and hands-on experience developing scalable, high-performance web applications. Skilled in building and deploying end-to-end solutions using MongoDB, Express.js, React.js, and Node.js. Dedicated to writing clean, maintainable code and collaborating effectively in remote and cross-functional environments. Passionate about solving real-world problems, learning new technologies, and delivering user-centric digital products.

Currently based in New York City and actively open to full-time opportunities.

PROFESSIONAL EXPERIENCE

Web Developer

Prime Vertex Softwares (Remote) | 2023 - Present

Developed and maintained responsive, dynamic web applications using the MERN stack. Collaborated with cross-functional teams to gather requirements and deliver tailored software solutions. Built reusable components and optimized front-end performance using React.js and Bootstrap. Integrated REST APIs and ensured seamless data flow between front-end and back-end systems. Debugged and resolved complex technical issues to improve system reliability and performance. Customized WordPress and Shopify themes, enhancing e-commerce functionality and visual appeal.

PROJECTS

Online Food Delivery System. | Oct 2024- Nov 2024

- Developing a full-featured online food delivery platform with user and admin interfaces.
- Implementing features like food item management, order processing, and Stripe-based payment integration.
- Creating a custom, responsive admin dashboard for seamless website management.

Event Management System. | Sep 2024- Oct 2024

- Built a MERN stack-based event management system with separate Admin and Exhibitor panels.
- Designed and implemented features like user profile management, booking system, and email-based password recovery.
- Ensured responsive UI with Bootstrap and provided real-time feedback using React Toastify.

Travel Prestige – Travel Guide Website (React.js). | Nov 2024- Dec 2024

- Designed and developed a sleek, responsive travel guide website to refine front-end development skills.
- Built interactive user interfaces using React.js and optimized for seamless navigation.
- Applied modern UI/UX principles using Figma to create visually appealing and user-centric designs.
- Implemented dynamic content rendering, ensuring a fast and engaging browsing experience.

QCS Global – Laboratory Website (WordPress). | Nov 2024- Dec 2024

- Developed a professional and responsive WordPress-based website for a global laboratory services company.
- Customized WordPress themes and plugins to align with the client's branding and functionality needs.
- Integrated contact forms, service pages, and informational content to showcase laboratory services.

USA Visa Advisor – Immigration & Visa Consultancy Website (WordPress). | March 2025- April 2025

- Built a responsive consultancy website with clear U.S. visa category explanations.
- Integrated contact and consultation forms for user engagement.
- Designed layout for trust and professionalism; ensured mobile optimization.
